**Landscape Designer / Landscape Architect / Project Manager:**

We are looking for a landscape designer / architect / project manager that has a minimum of (2) years experience in the design-build industry. **The Ground Crafter** is a small, award winning company that prides itself in servicing higher-end clientele with discerning tastes and an eye for detail. Typical projects range from \$35k - \$200k and we have a \$4k minimum contract price. This is an interesting opportunity for someone who wants the freedom of working from home as well as the field, shop and/or our residential office on two, wooded acres in Delafield. The understanding of hand or computer drafting and digital communication is key to this arrangement along with a willingness to wear numerous 'hats' throughout the season.

Applicant must be a skilled planting and hardscape designer, self-motivated, eager to achieve and be able to coordinate with highly skilled landscape professionals. Pictures of past work and a portfolio review are required and references are appreciated. This is an excellent opportunity to grow and enjoy your career with people that have a passion for designing outdoor living spaces. The Ground Crafter is a controlled growth company that appreciates adaptation and a truly team approach to company management and client-centric strategies.
